

Durable-DURHAM Hosiery is a product of industrial democracy—never of child labor. We have no strikes or lockouts.

Lucky is the family with a wise hosiery buyer

More than money can be saved by a hosiery buyer who knows values—who knows the strength and honest quality of Durable-DURHAM Hosiery. There is comfort and economy for every member of the family in Durable-DURHAM. It wears longer because it is made stronger. It is good-looking but never flimsy. Darning is avoided. Ask your dealer to show you

If you cannot find this hosiery, we shall appreciate your writing direct to the Durham Hosiery Mills, Sales Department, 88 Leonard Street, New York, giving us the name of your dealer.

# Film on Teeth

## Is What Discolors— Not the Teeth

All Statements Approved by High Dental Authorities

### Millions of Teeth Are Wrecked by It

THAT slimy film which you feel with your tongue is the major tooth destroyer. It causes most tooth troubles

It clings to the teeth and enters crevices. The tooth brush does not end it. The ordinary dentifrice does not dissolve it. So millions find that teeth discolor and decay despite their daily brushing.

The film is what discolors—not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. So brushing does not save the teeth if it leaves that film around them.

After years of searching, dental science has found a way to combat film. For daily use it is embodied in a dentifrice called Pepsodent.

Four years have been spent in clinical and laboratory tests. Now leading dentists everywhere are urging its constant use. And we supply a 10-Day Tube to anyone who asks. Thus countless homes have now come to employ this scientific dentifrice.

### Your Tube is Waiting

Your 10-Day Tube of Pepsodent is waiting. Send the coupon for it. Then note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten as the fixed film disappears. You will be amazed at these ten-day results.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to constantly combat it.

But pepsin alone won't do. It must be activated, and the usual agent is an acid harmful to the teeth. So pepsin long seemed impossible.

Now active pepsin is made possible by a harmless activating method. Because of patents it is found in Pepsodent alone.

For your own sake and your children's sake we urge immediate trial. Compare the results with your present methods.
