

*The Ladies Complete Guide to Crochet, Fancy Knitting and Needlework. By Mrs. Ann H. Stephens. New York: Garrett & Co., 18 Ann st.*

The talented authoress of "Fashion and Famine" is again before the public with a work which must prove acceptable to every lady. It is abundantly illustrated with original and choice designs in crochet on tinted paper apart from the letter press. It contains clear and complete instructions for every species of knitting, crochet and needle-work. The technicalities of the science are given in full. It contains an essay on needle-work and its history, which is alone worth the price of the book.
