INTRODUCTION	1
COUNTS OF YARNS	5
Worsted Yarns	5
Cotton Yarns	6
Spun Silks	7
Raw Silks	8
Linen Yarn	9
Woollen Yarns	9
To Reduce the Counts of Yarn in one system to its equivalent counts in another system	17
Ascertaining the Counts of "Folded" Yarns, whether yarn consists of one material or more	19
Twisting Different Materials	23
To find the Counts of a Yarn when three or more threads are twisted together	26
To find the Count of a Thread, which twisted with any known thread will produce one of a given count ..	27
In twisting together two threads of Different Counts, to find the weight of each required to produce a given weight	29
To find the Average Counts, when any number of yarns of different counts are used in the same cloth	30
The cost of "Folded" Yarns	33
To find the Cost of Mixed Yarns	38
Relative Diameters of Threads	44
The Twist of Yarns	47
SETT CALCULATIONS	49
To find the Ends per Inch, or in any number of inches, in any Sett System	53
When Ends, &c., are given to find the Sett	57

PAGE.

To Calculate Weight and Cost of Warp 60
When Weight of Warp is given to find Counts .. 63
When Weight, Counts, and Ends are given to find Length; or when weight, counts, and length are given to find Ends 64
Warp and Sett Calculations Combined 65
To find Counts, Weight, &c., of a Warp in one Material equal to a given Warp in another Material or when the weight is to be altered .. 67
To find the Counts of one Material used as Warp along with another Material—as Woollen with Worsted—the counts of the second material, and the relative weights being known 69
When Two Materials or Counts are to be used, the proportion of threads of one to the other being known, to find the Ends per Inch to produce a Warp of given weight 72
When two Materials are employed, each of known Counts, and the Weight of the Warp is known .. 77
When Two Materials—as Woollen and Worsted—are to be used in a Cloth, the total weight, the proportion of each, and the ends per inch being known, to find the Counts of each 80
Short Methods of Calculating Warps.. 81

To Calculate Weight, Cost, &c., of Weft .. 83
To find the Length, Hanks, or Weight of Yarn contained in a given Length of Cloth, the width of the cloth, and the picks or threads per inch being known 83
To find the Picks per Inch in a Cloth to use a certain quantity of Weft, the width and length of Piece being known 86
To find the Width or Length of a Piece, which will contain a given quantity of Weft, the picks per inch being known 87
To find the Counts, Weight, &c., of Weft in one material equal to a given weft in another material, or when the weight is to be altered 89
When Two Materials are to be employed, or two sets of threads of the same material but different counts, the proportion of picks of one to the other being known, and it is required to determine the number of picks of each per inch to produce a cloth of a given weight 89
Practical Application of the preceding Rules .. 90

PAGE.

When each Split in the Reed does not contain the same number of Ends, to find the ends in a given width of piece 97
When each Split in the Reed does not contain the same number of Ends, to find the average number per inch, or the average Sett 99
The calculations for striped and checked patterns.. 103

To FIND THE COST OF FABRICS 107
To find the price per lb. of Scoured Wool, the price in the grease being known 107

THE STRUCTURE OF FABRICS 113
What constitutes a perfect cloth? and what is meant by the "balance of cloth," or cloth structure? .. 114
Plain Cloth 114
Altering the Character of Plain Cloths 117
Twilled Cloths 119
To alter the Pattern and retain the same perfection of structure 121
In changing from one Pattern to another, to find the number of Ends or Picks per inch, to produce a cloth of the same character 122
Satin Cloths 127
Figured Cloths 128
Double Cloths 128
The alteration of the relative quantities of Warp and Weft, and retaining the balance of structure 128
The diameters of Threads of different counts .. 137
Table showing the relative diameters of Cotton Yarns from 200's to 1's 138
Table showing the relative diameters of Worsted Yarns from 120's to 1's 139
Table showing the relative diameters of Woollen Yarns from 60's to 1's—Yorkshire Skein Count .. 140
Table showing the relative diameters of Woollen Yarns from 60's to 1's—West of England Count.. 141
Table showing the relative diameters of Woollen Yarns from 60's to 1's—Galashiels Counts .. 142
Table showing the relative diameters of Linen Yarns from 200's to 1's 143
The relative diameters of Yarns of different materials 145
The influence of Twist upon the diameter of a Thread 148
The diameter of one Count of Yarn being given to find the diameter of any other count of similar yarn, or in any system of counting 149

PAGE.

The diameter of one Count of Yarn being given to find Ends or Picks per inch of that or any other counts of similar yarn, to make a perfect cloth in any pattern 152
Modifying Influences 160

FABRICS OF THE SAME STRUCTURE BUT DIFFERENT WEIGHTS 161
Having a Cloth of given weight, to find the counts of yarn, ends and picks per inch, to produce a cloth of any other weight and equal in structure .. 163
Having a Cloth of given weight, to find the counts of yarn, ends and picks per inch, to produce a cloth of any other pattern and weight, and equal in structure 168
Having a Cloth of given weight to find the counts of yarn, ends and picks per inch, to produce a cloth of any other weight, and to alter the character of the cloth, and be equally perfect in structure .. 171
To change from one Count to another Count and to find Sett or Picks to retain the same character of Cloth 172
To change from one Sett or Picks per inch, with a given count of yarn, to another sett or picks per inch, and find what counts of yarn will be required 173
To find what Counts of one Material may be substituted for another material of given counts—as woollen for worsted, worsted for cotton, &c.—to produce a similar cloth, when the sett or picks of the two fabrics is known 174
To find what Sett or Picks per inch will be required to produce a cloth of one material similar to a given cloth of another material, the counts in each case being known 176
To alter Cloths in weight only 178
To alter Cloths in Fineness or Coarseness only .. 178
To alter Cloths in respect to both Fineness and Weight 179

SUMMARY 181

APPENDIX A.. 182

APPENDIX B.. 216
