

Students!

The Math learning center is looking for part time math instructors. We are looking for motivated individuals who are competent in math and like to work with students. Instructors need to be proficient in high school math: algebra I & II, geometry, trigonometry, and calculus as well as adept in elementary through pre-algebra math. Instructors must be willing to learn a specific method to use with students. The center is open in the afternoon hours and Saturdays. This is perfect for undergraduate and graduate students. If you enjoy working with children and they enjoy working with you, then this may be the job you have been looking for. Please email your resume and cover letter to marana@mathnasium.com.
